MADE IN ITALY

DESIGN, CREATE
IN ITALY

RITMO S.P.A. is a world leader with over 35 years of experience in the manufacturing of plastic welding equipment. All products are designed and built according to International standards and directives (UNI, ISO, CEE). Since the very beginning, quality and technology innovation are RITMO's milestones, and time after time, this philosophy is always more recognized by the global market. RITMO strong points are its ideas to design and produce accurate, fast, versatile, modular and easy-to-use welding machines. Products range includes butt fusion, electrofusion and extrusion equipment. Ritmo is also providing a complete line of accessories and useful instruments for pipe cutting and weld preparation such as the band saws. RITMO's regards towards the client has brought to the new-born "RITMO FUSION OPERATOR SCHOOL", which is a welding school with the goal of building qualified personnel and spread the knowledge about the technical potentiality of RITMO's equipment: **TECHNOLOGY MADE IN ITALY.**

RITMO SERVICE

RITMO WORLDWIDE

Ritmo has professional distributors and resellers all over the world. Our staff is ready to assist you in English, Spanish, French, German, Japanese, Arab, Italian and Portuguese.

TRAINING

From many years now, we have decided that the best way to grant a client/distributor a perfect knowledge of our products is to invest in custom training, in our own premises. These courses are aimed to teach how to operate the products in the best way, and how to supply the "first aid" when necessary.

PRESALES TECHNICAL ASSISTANCE

When a client or a potential client wants to buy us a product, it is our standard procedure to help find the best solution to its needs.

GLOBAL ADVICE

In such a technical field as ours, the customer requires the best assistance. Thanks to the experience developed along the years, and to the co-operation with several manufacturers, institutions, schools and training institutes, RITMO is able to give the most comprehensive advice to no matter which related issue.

Our company is a long-time member of a UNIPLAST's (UNI-Italian National Plastics Standards Body) working group dedicated to the study and draw up of new standards within our field. The importance of this group is linked to the fact that the expansion of the plastic welding field ought to be followed by a crescent sensitivity for safety issues, so to have a sustainable and continuous growth. The working group prepares draws, hence present them to the UNI to be discussed and eventually transformed into new standards.

AFTER SALES TECHNICAL ASSISTANCE

Ritmo's Service Centre can solve all kind of technical issues, as well as overhaul our machines. Ritmo has other Service Centres abroad, linked to its official distributors.

STARTING AND TESTING

RITMO' technicians are prepared to make the starting and testing of workshop machines at the client' own premises, so that the fittings production can start almost immediately.

ALFA TEL - 800

ALFA TEL - 800 is a workshop machine designed to weld pre-insulated district HDPE pipes and valves for both heating and cooling lines.

ALFA TEL - 800 produces pre-insulated HDPE elbows within 400 ÷ 800 mm diameter range and jackets for valves within 400 ÷ 710 mm diameter range.

ALFA TEL - 800 has a machine body with facer and interchangeable heating elements. The fitting segments are loaded onto the machine carriages and tightened by clamps. The hydraulic movements of carriages, heating element, facer and clamps are driven by an handy control panel.

Each heating element is made by 2 jaws and it can be easily replaced to fit the joint geometry requirements. Both carriages can move along orthogonal directions to ensure the optimal match of the surfaces to be welded. The rotating clamps allow to manufacture elbows from segments with different angles and their design decreases the lead time to load, unload and align the fittings.

ASK FOR A QUOTATION

TECHNICAL FEATURES

Working range	Ø 400 ÷ 800 mm
Materials	HDPE, PP
Power supply	400V 3F+N+PE 50/60 Hz
Absorbed Power	15000 W
Dimensions (W x D x L)	4000 x 2100 x 2000 mm
Weight	2220 Kg
